

Fashion Berkelanjutan, Suatu Keharusan

Nurul Akriliyati, S. Sn, M. Sn

A large green circle is centered on a white background. Inside the circle, there is text in a red, italicized, serif font. The text is arranged in two lines. The top line reads "I have NOTHING to wear" and the bottom line reads "Buy now or cry later". The word "NOTHING" is in all caps. In the top left corner of the image, there is a small, partially visible line drawing of a person's head and shoulders, wearing a feathered headdress with blue and green feathers. In the bottom right corner, there is a small, partially visible line drawing of a person's leg and foot, wearing a sandal.

I have NOTHING to wear

Buy now or cry later

A large green circle is centered on a white background. Inside the circle, there are two lines of text in a dark red, serif font. The top line reads "I have NOTHING to wear" and the bottom line reads "Buy now or cry later". The word "NOTHING" is in all caps. In the top left corner, there is a small, stylized illustration of a person's head and shoulders, wearing a blue and white striped shirt and a green necklace. In the bottom right corner, there is a small, stylized illustration of a person's legs and feet, wearing blue pants and white shoes.

Sejarah

Fast Fashion

Istilah yang digunakan untuk menggambarkan model bisnis industri pakaian yang mereplikasi tren catwalk terbaru dan desain mode tinggi, memproduksinya secara massal dengan biaya rendah, dan membawanya ke toko ritel dengan cepat, saat permintaan sedang tinggi.

(Kompas, 15/9/2022)

Kondisi kerja yang tidak aman kemudian dihubungkan dengan adanya peningkatan kekerasan baik mental, fisik maupun seksual di masyarakat. Salah satu peristiwa yang menjadi perhatian dalam keamanan pekerja di industri *fashion* adalah peristiwa keruntuhan Rana Plaza pada tahun 2013 di Bangladesh. Di mana gedung yang terdiri dari beberapa pabrik pakaian dan sejumlah toko ini runtuh dan menyebabkan sekitar 1.100 pekerja meninggal dunia dan menjadi salah satu tragedi industri terburuk di dunia. Hal ini menunjukkan dampak *fast fashion* yang begitu luas tidak hanya bagi lingkungan namun juga bagi kesejahteraan umat manusia.

Women search for used clothes amid tons discarded in the Atacama desert, in Alto Hospicio, Iquique, Chile, on September 26, 2021. EcoFibra, Ecocitex and Sembra are circular economy projects that have textile waste as their raw material. The textile industry in Chile will be included in the law of Extended Responsibility of the Producer (REP), forcing x and textiles importers take charge of the waste they generate. (AFP/Martin Bernetti)

Dampak Bagi Lingkungan

ENVIRONMENTAL IMPACT OF THE FASHION INDUSTRY

OVER-CONSUMPTION

40%

of the clothing in our wardrobe is rarely or never worn.

60

new items are bought each year.

(in Germany / consumer)

in 2020, garments are only worn **half as long** as they were in 2002.

Half of our clothing ends up in landfills in less than 3 years.

WASTE OF RAW MATERIALS

Chemical Fibers

polyester/nylon/elastane

60 %

of all clothing is made
from polyester.

6 kg CO₂

2 kg CO₂

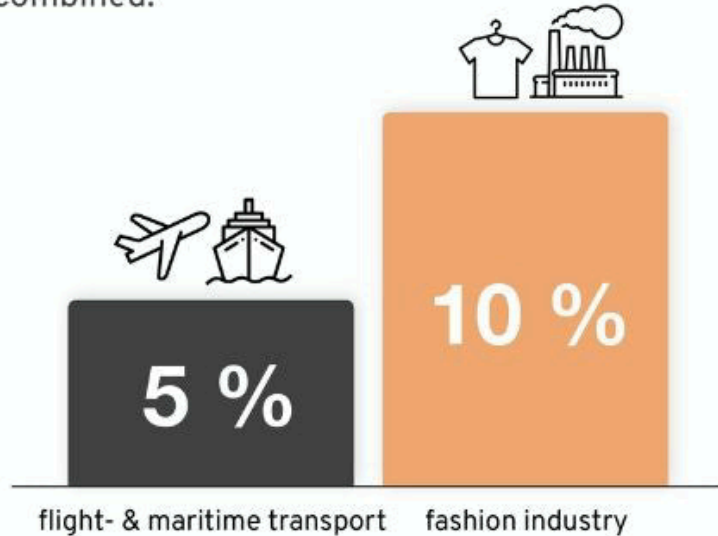

Natural Fibers

cotton/silk/wool

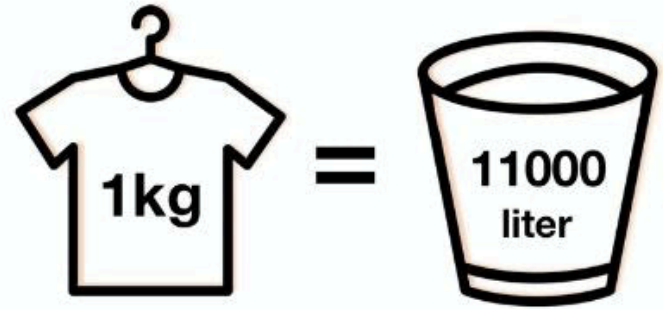

40 %

of all natural fabrics are
made from cotton.

Polyester is made from petroleum a - it is **not biodegradable** and produces a lot of CO². Thus the fashion industry generates more CO² than the flight and maritime industry combined.

Cotton is **biodegradable**, but needs a lot of water. In its cultivation, pesticides are often used.

of cotton grown is genetically modified.

WATER POLLUTION

Chemical Fibers

synthetic clothes

washing synthetic clothes

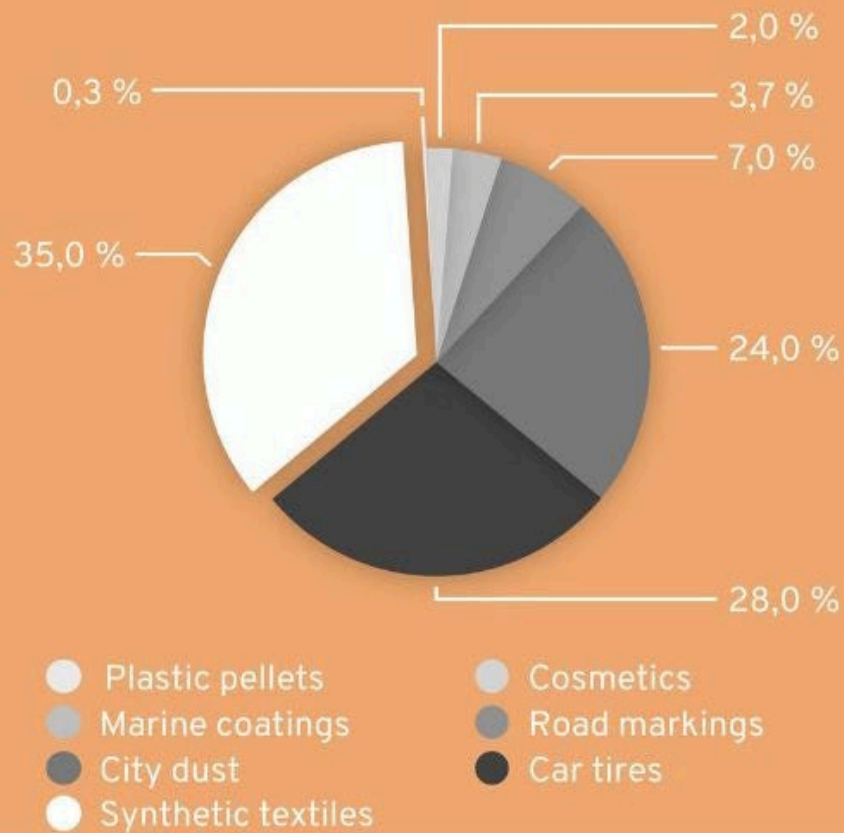

microplastics in
wastewater, oceans
and rivers

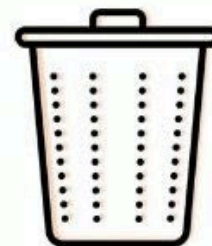

microplastics get into
animals through food

microplastics gets in
our food and in the
end also in our bodies

GARBAGE

just **1 %**

of clothing is recycled
into new clothing.

80 %

of all clothing sold in
the EU ends up on
landfills.

Read Now

* Generic classification based on chemical composition as defined by the Textile Fiber Products Identification Act. (Manufactured Catagory)

Fast Fashion vs Slow Fashion

WHAT IS SLOW FASHION?

FAST FASHION

SLOW FASHION

Definition	A Business model of the fashion industry where as many collections as possible are brought to market in the most short period as possible.	Slow Fashion is a counter-movement, in which attention is paid to a sustainable and conscious approach to fashion.
Consumption	A lot of clothing is bought in a short time. But the purchased items are not worn for long, as they quickly go out of fashion.	Attention is paid to sustainable consumption, where only what is really necessary is bought. Value is placed on environmentally friendly materials and good production. Second-hand clothes are also part of Slow Fashion.
Materials	Fast Fashion clothes are usually made of synthetic fibers (polyester, elastane etc.).	Slow Fashion clothes are made from natural fibers such as cotton or recycled fabrics.
Production	Production typically takes place in developing countries where standards are not respected. Furthermore, workers do not receive fair wages.	Production takes place either in Western countries or in developing countries where human rights, standards and fair wages are respected.
Water	Fast Fashion is responsible for a lot of water pollution through the use of chemicals and microplastics.	Water is often recycled and filtered, so that no pollutants get into the wastewater. In addition, hardly any microplastics get into the oceans and rivers through the natural fibers.
CO2	A polyester T-shirt causes 9 kg of CO2 during production.	A cotton T-shirt causes 2 kg CO2 in production.
Waste	80% of all clothing is thrown away, only 1% of clothing gets recycled.	Clothes can be repaired, sold, exchanged or donated to create a circular economy. In this way, waste is reduced.

FAST FASHION

SLOW FASHION

PROS

- ▶ stylish
- ▶ inexpensive
- ▶ easy to find

- ▶ long-lasting
- ▶ sustainable
- ▶ high quality
- ▶ fair production

CONS

- ▶ not climate friendly
- ▶ no fair production

Find your system

A recognisable system means your clothes will always be in reach.

Organise these: **1 BY ITEM** **2 BY COLOUR**

HANG

TROUSERS,
SKIRTS, SHIRTS,
SUITS, COATS,
AND JACKETS

FOLD

KNITWEAR,
T-SHIRTS,
LOUNGEWEAR
AND DENIM

Hangers

Wooden and padded hangers are the best for maintaining the shape of a garment. **Gain extra space** in small wardrobes by using **slim hangers**.

SUITS

SKIRTS

SMALL SPACES

***TIP:** Remove garments from plastic dry cleaner bags, as they don't allow the fabric to breathe.

Storage

Use a **suitcase** to store **out of season garments**, or use boxes and keep them on the top shelf.

***TIP:** Save on space by placing smaller handbags inside larger ones.

Doors

Maximise your wardrobe real estate and use a **door rack** to hang your belts, scarves and ties.

Shoes

Clear shoeboxes will protect your shoes whilst letting you see them at a glance. Otherwise, **invest in a shoe rack** and keep it at the base of your wardrobe.

***TIP:** You can **fit more pairs** in by **alternating the way they're facing**.

Drawers

Customizable wire drawers are perfect for keeping fiddly things such as socks at bay. **Drawer dividers** will help keep things even neater. Keep **hosiery and socks** manageable by **folding them together**.

BRILLIANT TRICKS TO MAKE LAUNDRY DAY SMARTER AND MORE EFFICIENT

Just because laundry is a chore doesn't mean it has to take forever. Use these easy tips to make cleaning your threads a breeze.

1 KEEP THREE SEPARATE LAUNDRY BAGS – whites, darks and delicates – and sort as you go during the week to streamline laundry day.

2 DON'T USE FABRIC SOFTENER ON TOWELS. It will ruin their absorbency.

3 A SPLASH OF WHITE VINEGAR in the last rinse keeps hand-washed items from staying sudsy.

4 DON'T WASH

YOUR JEANS, just stick them in the freezer overnight to eliminate any odor.

5 And to GET STRETCHED JEANS BACK INTO SHAPE, run them through the dryer (without washing first) inside out.

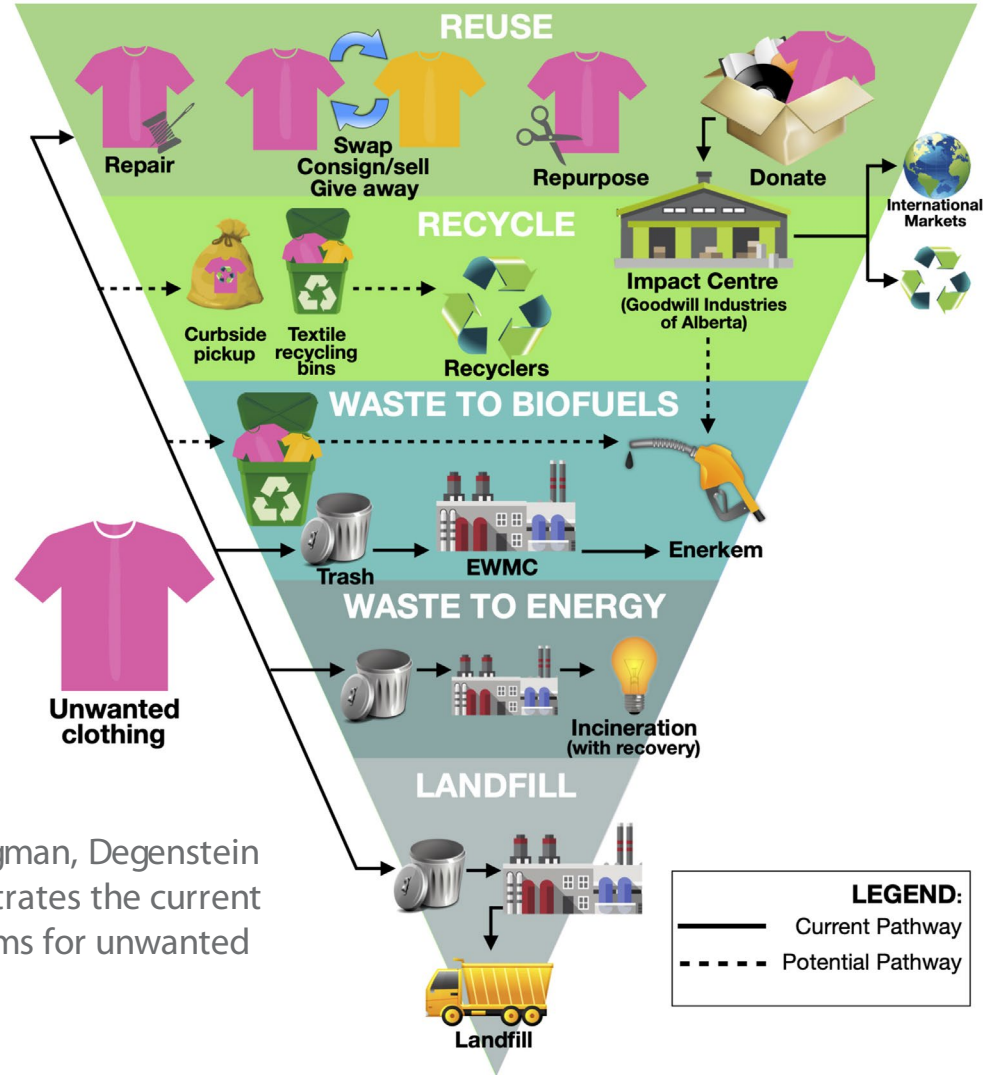

6 FIGHT FOOD STAINS by blotting them with foaming shaving cream.

7 If a bright-colored item bleeds onto other clothes in the wash, don't toss them in the dryer. **REWASH THE STAINED ARTICLES** without the offending item right away.

8 If you have multiple loads to dry, **START WITH THE LIGHTWEIGHT, MORE DELICATE ITEMS** – they are less likely to shrink if you start with a cold dryer.

This infographic from Krogman, Degenstein and McQueen (2021) illustrates the current and potential waste streams for unwanted clothing.
